Attn: Mr. Edgar Hurle

RE: FM - 200600414
DOT Project No. 138-221
Moses Wheeler Bridge
Milford/Stratford

Dear Mr. Hurle:

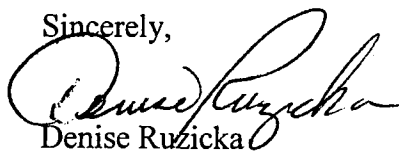

The Inland Water Resources Division of the Department of Environmental Protection has reviewed the flood management certification application package dated February 22, 2006, prepared for the Department of Transportation by STV Incorporated. The certification document states that the proposed activity has been designed in compliance with the requirements of Section 25-68b-h of the Connecticut General Statutes (CGS) and Section 25-68h-1 through 25-68h-3 of the Regulations of Connecticut State Agencies (RCSA).

The project consists of replacement of the I-95 bridge (Moses Wheeler) as shown on plans entitled "Reconstruction of the Moses Wheeler Bridge, Stratford/Milford," dated February 2006.

The project is located within a the 100 year flood zone of the Housatonic River. There are no adverse flooding impacts caused by this project. Therefore, the certification submitted on February 27, 2006 inclusive of all revisions and the latest submittal on March 28, 2007 is approved.

No revisions or alterations to the approved plans are allowed without first obtaining written approval from this Division of such alternations. If there are any questions, contact Sharon Yurasevecz of the Inland Water Resources Division at 860-424-3019.

Sincerely,

Denise Ruzicka
Director
